

## Instruction of pairing **Aluprof remotes**

**ROLLER SHUTTERS**

## General Recommendations:

The installation and configuration of the blind should be carried out only by a trained installation team. It is essential to comply with all relevant health and safety regulations, particularly those concerning work at height and with electrical equipment.

## Programming the First Remote Control

1. Enter the motor's programming mode by pressing the button on the motor's antenna.
2. Press the P2 button on the remote control twice.
3. Press the Up button.
4. The motor will emit a sound signal.
5. The remote control is now paired and ready for use.

## Adding an Additional Remote Control

1. On a previously programmed remote, press the P2 button twice.
2. On the new remote, press the P2 button once.
3. After hearing a sound from the motor, press the Up button on the new remote.
4. The new remote has been successfully paired with the motor.

## Removing All Remote Controls

1. Press the P2 button on a programmed remote control.
2. Press the Stop button.
3. Press the P2 button again.
4. Press the Stop button once more.
5. All remotes have now been disconnected from the motor.
